

QAPIShield™ Feature Comparison Guide

Advanced Risk & Compliance Capabilities by Subscription Tier

Overview

QAPIShield offers three subscription tiers designed to meet the needs of skilled nursing facilities of all sizes. This guide provides a comprehensive comparison of advanced risk management and compliance capabilities across our Starter, Professional, and Enterprise plans.

Subscription Tiers at a Glance

Plan	Monthly Price	Ideal For	Bed Limit
Starter	\$299/month	Single facility, getting started	Up to 60 beds
Professional	\$599/month	Growing facilities, enhanced features	Up to 120 beds
Enterprise	Custom pricing	Multi-facility organizations	Unlimited

Advanced Capabilities Comparison

1. Event-Triggered Clinical Alerts

Feature	Starter	Professional	Enterprise
Basic risk notifications	✓	✓	✓
Risk threshold change alerts	—	✓	✓
Compound risk factor detection	—	✓	✓
Custom alert rules	—	—	✓
Multi-facility alert routing	—	—	✓

What it does: Automatically notifies clinical leadership when resident risk levels change or compound risk factors emerge. Examples include alerting the DON when fall risk escalates from Moderate to High, or flagging for provider review when infection risk is High with elevated temperature.

Why it matters: Transforms QAPIShield from a passive reporting tool into an active prevention system, supporting early intervention and adverse-event prevention.

2. Risk Change-Over-Time Tracking

Feature	Starter	Professional	Enterprise
Current risk level display	✓	✓	✓
Historical risk trending	✓	✓	✓
Risk change documentation	✓	✓	✓
Intervention timeline correlation	✓	✓	✓
Multi-facility trend comparison	—	—	✓

What it does: Tracks changes in resident risk levels over time, allowing facilities to demonstrate early identification of rising risk, timely intervention following risk escalation, and ongoing monitoring and reassessment.

Why it matters: Documents facility response to changing clinical conditions, supports QAPI committee review, and strengthens survey defense for F-Tag related citations.

3. Audit Trail & Compliance Log

Feature	Starter	Professional	Enterprise
Assessment completion logging	✓	✓	✓
Care plan generation tracking	✓	✓	✓
Risk escalation alert records	✓	✓	✓
Follow-up action documentation	✓	✓	✓
Extended log retention (2+ years)	—	✓	✓
Custom audit report generation	—	—	✓

What it does: Maintains a lightweight audit trail that records when risk assessments are completed, when care plans are generated, when risk escalation alerts occur, and when follow-up actions are documented.

Why it matters: Supports internal compliance monitoring, surveyor review, dispute resolution, and documentation verification.

4. Export & Print-Ready Reporting

Feature	Starter	Professional	Enterprise
QAPI reports (PDF export)	✓	✓	✓
Care plans (text/PDF export)	✓	✓	✓
Dashboard summaries (printable)	✓	✓	✓
Bulk export capabilities	—	✓	✓
Custom report templates	—	—	✓
White-label export options	—	—	✓

What it does: Provides export options to support survey preparation and administrative review, including QAPI reports exported to PDF, care plans exported as text or PDF, and dashboard summaries suitable for printing.

Why it matters: Allows facilities to easily include QAPIShield outputs in survey binders and compliance documentation.

5. Resident-Level Risk Snapshot

Feature	Starter	Professional	Enterprise
Basic risk summary	✓	✓	✓
One-page risk snapshot	—	—	✓
Contributing factors detail	—	—	✓
Active interventions display	—	—	✓
Recent risk changes timeline	—	—	✓
IDT meeting integration	—	—	✓

What it does: Includes a one-page resident risk snapshot that summarizes current risk levels by category, key contributing risk factors, active interventions, and recent risk changes.

Why it matters: Supports shift handoff communication, IDT meetings, and DON/ADON review with comprehensive, at-a-glance resident risk information.

Additional Enterprise Benefits

Enterprise customers receive exclusive access to:

- **Unlimited facilities and users** — Scale across your entire organization
- **Custom EHR integrations** — Connect with PointClickCare, MatrixCare, and other systems
- **Dedicated success manager** — Personalized onboarding and ongoing support

- **Priority support & SLA** — Guaranteed response times and escalation paths
 - **Corporate analytics dashboard** — Organization-wide risk visibility
 - **White-label options** — Brand QAPIShield with your organization's identity
 - **Custom training programs** — Tailored staff education and certification
-

Getting Started

Starter Plan

Best for single facilities looking to implement AI-powered risk prevention. Start with a 14-day free pilot to experience the platform.

Professional Plan

Ideal for facilities requiring advanced clinical alerts and enhanced reporting capabilities. Includes all Starter features plus event-triggered alerts and extended compliance logging.

Enterprise Plan

Designed for multi-facility organizations needing centralized risk management, custom integrations, and dedicated support. Contact our enterprise team for custom pricing.
